### [BIM Designer | Kildare](#)

### **BIM Designer | Kildare**

- Large international market leading main contractor
- Excellent package and career development prospects
- Large prestigious projects

Oradeo recruitment is currently recruiting for a **BIM Designer** to work with a market leading Mechanical, Electrical & Instrumentation contractor in Kildare on a permanent basis working on a prestigious project.

### **Duties and Responsibilities:**

- Preparing and developing detailed Revit models of Mechanical systems
- Developing/red-lining schematics and new plan set documentation for all Mechanical systems
- Updating and modifying existing models and drawing sets as required
- Managing the creation, issuing and revisions of drawings & models
- Coordination of MEP services with all other disciplines to develop clash resolved models and export coordinated drawing sets from same.

- Create and release data centre mechanical designs and collaboration in a fast paced environment to scheduled targets.
- Work with consultants, vendors and suppliers
- Work on concurrent projects in multiple geographical locations
- Work as part of an internal design team
- Provide coordination support for information requests during construction phases.
- Be self-motivated and work within the group as well as within other teams

### **Necessary Requirements:**

- Specialist Diploma/qualification in Building Information Modelling
- 3+ years' experience designing mechanical systems on mission critical projects
- Experience of drawing deliverables for Data Centres or other large facilities
- Experience using Revit to design and coordinate large Mechanical projects
- Working knowledge of building engineering and construction technology
- Experience in developing Single Line schematics and layout drawings and understanding the relationship between both.
- Experience taking drawings from conceptual design through construction documents
- Good understanding of Mechanical systems and their configuration within data centres
- Experience in the establishment and management of BIM models including orientation, geo-positioning, coordination and the setup of review models.
- The exporting of embedded data and schedules to spreadsheets
- Excellent organization skills in archival & maintenance operations of project documents
- Organized and have the ability to set priorities and meet deadlines
- Be a motivated, highly dependable & team player individual
- Possess excellent communication skills, attention to detail,
- Good understanding of quality standards and national standards (Hospitals, Fabrication Plants, etc.)
- Understanding LEAN Engineering
