

BIM Manager | Netherlands

BIM Manager | Netherlands

- Major Hyperscale Data Centre Project
- Tier 1 International Contractor
- Key Digital Delivery Role with Long-Term Pipeline

Oradeo Recruitment is currently seeking an experienced **BIM Manager** to join a leading international main contractor on a high-profile **data centre project in the Netherlands**. This is a pivotal role focused on the digital coordination, implementation, and delivery of Building Information Modelling (BIM) processes across major technical packages.

Responsibilities:

- Lead and manage the implementation of BIM processes across the full project lifecycle
- Coordinate and maintain the project's digital models to ensure accuracy, consistency, and collaboration across disciplines

- Work with internal and external design teams, consultants, and subcontractors to align BIM execution plans with project goals
- Manage model-based clash detection and resolution processes using Navisworks or similar tools
- Ensure all BIM data is structured, validated, and compliant with ISO 19650 standards and client protocols
- Support site teams in leveraging BIM for construction sequencing, coordination, and data extraction
- Train and guide project teams on BIM tools and best practices
- Provide digital reporting, federated model updates, and progress tracking to project leadership
- Assist in the handover and commissioning of BIM data in accordance with client asset information requirements

Requirements:

- Degree in Architecture, Engineering, Construction Technology or related field
- 5+ years' experience in BIM coordination/management, ideally within large-scale MEP or data centre environments
- Expert user of Revit, Navisworks, and BIM 360/ACC platforms
- Familiarity with ISO 19650 standards and Common Data Environment workflows
- Strong communication, coordination, and leadership skills
- Ability to work collaboratively with multi-disciplinary teams across design and construction
- EU passport or right to work in the Netherlands preferred
