## Calibration Engineer | Leinster

- **Leading Medical Device Company in Leinster**
- **Excellent career progression opportunities along with a generous package.**

**Oradeo Recruitment** is presently seeking interest for an experienced **Calibration Engineer** who will be responsible for operational excellence in calibrations management both during site build and transitioning into full operations.

Become a **Calibration Engineer** with a Leading Medical Device Company in Leinster. This position would come with an excellent remuneration package and a clear path for career growth and development towards a Senior Engineer and beyond.

## Calibration Engineer Responsibilities:

- Ensure calibration and instrumentation adherence to site, corporate and regulatory requirements, safety regulations and acting as point of contact during all internal and external audits.
- Provide expertise input for technical instructions, best practices and

standard operating procedures in the execution of calibration principles on site.

- Participate in cross functional teams and act in the capacity as site calibrations SME for investigations, CAPAs and change controls as required.
- Develop and sustain an instrument reliability program demonstrating tangible improvement initiatives reducing instrument related discrepancies / failures, contributing to cost saving initiatives, and optimizing maintenance / calibration programs for instrumentation and test equipment on site.
- Develop and lead upgrade projects, managing all aspects from concept justification to final commissioning realisation.

### **Necessary skills and requirements:**

- Preferably a third level qualification in Automation or Instrument Engineering or Equivalent.
- Significant level of experience in a highly regulated environment (Biopharma and Pharmaceutical preferred) as calibration/instrument engineer
- Experience in pharmaceutical industry in the capacity of Calibration Engineer during sustaining/day to day operating environment is ideal.
- Experience as a calibration/instrument engineer with responsibility for regulatory or client audit readiness and execution.
- Experience with a start-up or Greenfield site is advantageous.
- Experience in leading site wide instrumentation projects to completion.
- Demonstrated experiencing of budgeting control and management is preferred.
