Civil Engineer / CSA Engineer | Tier 1 Main Contractor | Sweden

- Top European Tier 1 Main Contractors with significant annual turnover.
- Excellent career progression opportunities along with a generous package.
- Exposure to large, interesting and prestigious projects.

Oradeo Recruitment is presently seeking interest for an experienced **Civil Engineer / CSA Engineer** ideally with solid main contractor / specialist subcontractor experience to join one of Europe's leading Tier 1 Main Contractors permanently based in Sweden. As a **Civil Engineer / CSA Engineer**, you will gain exposure to prestigious projects across Mainland Europe on large building/construction sites and initially will be involved in ensuring the delivery of CSA (Civil Structural & Architectural) packages ranging in value from €5-€7.5 million respectively based in Sweden.

Become a **Civil Engineer** with a building contractor with an outstanding reputation in the market on large scale construction projects. This position would come with an excellent remuneration package and a clear path for career growth and development towards Senior Engineer, Project Management and beyond.

Civil Engineer / CSA Engineer Responsibilities:

- Cradle to grave delivery of small works packages with all-encompassing roles and responsibilities including the coordination of the CSA Scope of works with project BIM
- Checking plans, drawings and quantities for accuracy of calculations.
- Ensuring that all materials used and work performed are as per specifications.
- Managing, monitoring and interpreting the contract design documents supplied by the client or architect
- Liaising with any consultants, subcontractors, supervisors, planners, quantity surveyors and the general workforce involved in the project
- Liaising with clients and their representatives (architects, engineers and surveyors), including attending regular meetings to keep them informed of progress.
- Planning the work and efficiently organizing the plant and site facilities in order to meet agreed deadlines.
- Resolving any unexpected technical difficulties / technical design queries (RFI's) and other problems that may arise.
- Proficient in the use of Structural design software and AutoCAD
- Review and submit technical submittals along with overseeing H&S onsite
- Monitor and oversee Quality assurance/installation onsite and to keep QA documents up to date including inspector reports

Necessary skills and requirements:

- 3rd level qualification in Construction Management/Engineering
- Minimum of 3 years' experience in Building Projects with a main contractor or specialist contractor acting as a **Site Engineer, Setting out Engineer, CSA Engineer or Project Engineer** within Europe
- Experience of working on data centre projects would be advantageous
- Strong setting out experience
- Strong operational skills and an attention to detail
- Familiar with MS Office applications such as Word, PowerPoint, Excel and Outlook.
- Strong and effective communication and interpersonal skills.
- Ability to work in a team or on own initiative, to perform multiple tasks at a high level of quality and to work well under pressure and within a strict deadline environment
