Commissioning Manager

- **Travel & Living Expenses Paid**
- **Data Centre**
- **Principal European M&E Engineering firm**

Commissioning Manager – One of the world's largest M&E engineering organisations are offering an opportunity for a commissioning manager to join them on large, €300million+ data centre project in Denmark. With a catalogue of blue chip clients, and upcoming, high value projects, this is a role that offers security, progression & prestige. As the commissioning manager for the electrical package on this data centre project, you will play an important role in quality verification and client handover. Leverage your background in electrical engineering on complex electrical systems within large scale project with bleeding-edge technologies. Your career with this company will extend into the future with upcoming projects of similar scale as you ply your trade as a commissioning manager across Ireland, UK and mainland Europe. Language is not an issue, as this project is in English.

Duties and responsibilities:

- Identifying problems and shortcomings with existing systems.
- Making improvements to and offering advice about operational procedures
- Scheduling and coordinating work to tight deadlines

- Ensuring that equipment works to its specification
- Producing or assisting in the production of all test and commissioning documentation.
- Investigating problems, diagnosing/repairing faults
- Ensuring the safe testing and commissioning of completed installations to achieve the necessary plant performance in accordance with project programme requirements.
- Troubleshooting
- Liaising with installation/project engineers
- Supervising engineering and technical staff
- Writing reports and documentation
- Providing technical support
- Ensuring safe working conditions
- Training maintenance and operative staff where appropriate

Necessary skills and requirements:

- Minimum of 6 years' experience as a Commissioning Engineer.
- Experience as a Commissioning Engineer/Manager on hi-tech electrical projects e.g. Data centre, Pharma, Energy, Industry etc
- Min 3rd level qualification in electrical engineering or similar
