## Demand Control Manager – West of Ireland & Shannon

- **Leading Pharma Company in the West of Ireland**
- **Excellent career progression opportunities along with a generous package.**

**Oradeo Recruitment** is presently seeking interest for a Demand Control Manager in our clients Supply Chain Department located in Galway and Shannon.

### **Main Duties and Responsibilities:**

- Deliver service/inventory performance across end to end global value streams with direct accountability for supply chain demand control activities
- Maintain and develop Node 1 Demand control processes that both protect and predict supply chain risks
- Manage resolution of exceptions within the demand time fence
- Responsible for the management of the PTF for supply planning and distribution planning
- Responsible for highlighting risks through Regional / Market Demand monitoring
- Optimize and improve the Demand Planning Change Request process
- Develop techniques that manage abnormal demand
- Develop a culture of accountability around maintaining key supply chain inputs (both within planning and with other key functions) that reflect actual performance as it exists in the current state

- Member of the supply chain planning team jointly responsible for growing the influence of the department through the development of relationships and execution of key projects.
- Partner with other supply chain planning teams to develop standardized project tracking and status reporting documents and processes
- Manage a team of centrally located, globally oriented Supply Chain Planners and drive overall career goals for team members

The following are minimum requirements related to the **Demand Control Manager** position:

- BS or BA in Supply Chain, Logistics, Operations, Industrial Engineering, Systems Engineering, Mathematics, or other related field
- Minimum 6-8 years of business experience supply chain, project management, planning or IT systems, experience in all three areas strongly preferred
- APIC CPIM and/or CSCP certification preferred
- Experience with medical devices preferred
- Experience with one or more ERP systems strongly preferred
- Experience with one or more APS strongly preferred
- In-depth knowledge of Lean Manufacturing
- In-depth knowledge of Six Sigma
- Broad knowledge and experience with project management tools and methods
- Demonstrated ability to lead and coach the implementation of transactional improvements through cross-functional teams by listening and utilizing influence skills. (leadership)
