Design Engineer | Façade Experience | Dublin

- Large market leading specialist Construction Company with significant annual turnover
- Large, complex and prestigious projects spanning various sectors on industry
- Impressive list of existing clients made up of leading Main Contractors, consultancies & architectural practices with over 90% repeat business
- Excellent package and clear scope for career development

Oradeo Recruitment are presently seeking an experienced **Design Engineer** with **Façade** experience to work with a Market Leading Specialist Contractor based in Dublin on a permanent basis. Our client is a leading manufacturer, supplier and installer of architectural facades servicing both the Irish and UK Construction Industry with over 40 years' experience in the industry.

Design Engineer Responsibilities:

- To determine resource requirements in conjunction with the contract manager to accomplish programme deadlines
- To participate and contribute to the mobilisation of projects
- To provide design solutions & material specifications & quantities tailored to our production / outsourcing capabilities
- To identify and request at early stages of design the required information the client must have to progress its design, procurement, manufacture & installation
- To record & document information flow (Drawing registers, RFI's , forward loads, cutting lists)
- To assist and mentor less experienced designers in their methodologies & systems
- To provide information to the internal customer / colleagues in an agreed manner they can use and work with in a timely manor
- To keep up to date with technology and façade product procurement lead times
- To focus on company objectives for each project
- To keep our clients and in-house project teams informed of changes to the scope of work as they arise
- To communicate difficulties experienced in the design process with the contracts manager & the project team that will affect the client's programme of works
- To use company procedures in a positive and proactive manner to achieve the correct end result for the project

Necessary Skills and Requirements:

- Must have in-depth knowledge of construction industry methodologies on detailing and building erection sequencing
- Computer literate in AutoCAD /3D modelling / Microsoft office
- Have experience of the major aluminium systems supplier's products
- 1 years + facade detailing and procurement experience
- Experience in Construction or Engineering environment
- Diploma / Degree in Civil Engineering, Architecture or related discipline

For more information about this Design Engineer role or other Design Engineer positions, contact Declan Duggan at Oradeo Recruitment confidentially on +353 1 687 7188 or apply in confidence.
