Electrical Project Manager | Europe | Top M&E Contractor

- Market leading international M&E Contractor with significant annual turnover
- Excellent package on offer with clear scope for career development
- Large prestigious projects for many well-known blue-chip clients in Dublin & Europe within Pharmaceutical, Data Centre and Industrial sectors

Oradeo Recruitment is presently seeking interest for an experienced **Electrical biased Senior Project Manager** with strong Building Services/Electrical Engineering background initially to work on an array of Pharmaceutical and Data Centre projects in **Europe**.

Oradeo Recruitment's client is an International Mechanical and Electrical Company which has gained significant experience across a wide section of construction sectors including Commercial, Industrial, Data Centre, Pharmaceutical or Power Generation on both Public and Private tenders/projects.

As a **Senior Project Manager (Electrical biased)** coming from an engineering or building services background you will join this growing multi-disciplined engineering construction team working on a variety of different projects across various Data Centre, Pharmaceutical, process, cleanroom, power generation and Industrial sectors. In return you the **Electrical Project Manager** will receive professional and personal development opportunities to help you **become a future leader within the organisation in addition to a fantastic salary with heaps of additional benefits.**

Duties & Responsibilities of the Electrical Senior Project Manager;

- The **Electrical biased Senior Project Manager** will Coordinate Electrical design, work with consultants and subcontractors
- Provides day-to-day contract and project leadership in line with the vision, purpose and core values of the organisation.
- Supervise the progress of work
- Prepare the project programme, including the delivery strategy and ensure project milestones are achieved.
- Ensure smooth and timely flow of information between all parties to the contract.
- Endeavour to identify and predict potential bottlenecks and delays and action remedies
- Keeping the project stakeholders informed of progress, cost and any other relevant issues
- Review project scope, and manage the budget and schedule
- Participate in design reviews.
- The successful **Electrical Senior Project Manager** will manage safety and quality aspects of the project in accordance with company procedures
- Agree valuations and final accounts with contractors and sub-contractors.
- Review issues to drive continuous improvement
- Management of all commercial/contractual related aspects
- Preparing and complete commercial monitor reconciliation on a monthly basis to highlight areas of overspend or savings thus appropriate action can be taken
- Ensuring in receipt of and fully aware of all information at Estimating/Surveying handover
- The Development of Project Commercial Plans and ensuring buy in from the project team and management
- Plan, maintain and control the financial administration of all construction work to obtain and maintain maximum cost effectiveness
- Understand and implement the requirements of the company Commercial Management
- Procedure
- Work as an **Electrical Senior Project Manager** to ensure effective procurement and supply chain management
- Fosters a client focused, technically excellent, driven, positive-oriented, accountable and sustainable environment.

- Engages, stretches and leads high performance project management teams.

Senior Project Manager (Electrical biased) Necessary skills and requirements;

- Ideally will possess a 3rd level qualification in Building Services / Electrical Engineering or equivalent although strong trades background will also be considered
- Ideally you will possess a minimum of 5 years of experience in a similar Senior Project Manager / Contracts Manager role in M&E contracting.
- **In addition to having a strong technical background in contracting, the electrical Senior Project Manager ideally will possess experience on projects in excess of €30/£25 million in the Pharmaceutical, Data Centre, Industrial and Commercial**
- A proven track record of electrical fundamentals is essential
- Strong operational skills and an attention to detail, and experience of the design build process
- Good presentation and general management skills
- Strong written communication abilities, and the ability to negotiate a strong commercial position for the company are also essential
- The ability to multi-task and take an overview on a large number of projects at any time
