

As an **Estimator**, you will be able to build your career by supporting the senior management in the delivery of 'leading edge' engineering projects and the project team from the earliest stages of the projects. The **Estimator** will be pivotal in developing long-term relationships with the supply chain and providing a cohesive tender to the commercial team for delivery. The role will be fast paced and diverse, working across numerous sectors.

Estimator Duties & Responsibilities:

- Compiling estimates, budgets and cost plans
- Under the **Estimator** remit you will be tasked with ensuring thorough measurement of precast concrete components in addition to the review of tender documents, drawings, specifications and contracts
- Assessing material, labour and equipment costs and the Analyses of different quotes from sub-contractors and suppliers
- Preparation of documentation
- The **Estimator** will ensure compilation of Quality Tender Submissions while also taking part in pre-, mid- & post-tender meetings
- Providing cost advice to architects, PQS, developers and main contractors
- Dealing with clients pre & post sales while working alongside your sales and marketing colleagues
- Interfacing and dealing with other departments
- Provide Commercial & Contractual advice to the Project team members
- Advising managers of bid prospects
- In addition to the above you, the **Estimator** will report regularly to management on competitor activity, market trends and any other market dynamics that may be useful to management

Necessary Requirements:

- Quantity Surveying degree or equivalent with a minimum of 5 years post qualification experience in an Estimating role
- Strong communication skills with the ability to manage multiple projects
- Ability to utilise IT equipment effectively and adapt to new Software technologies
- Strong communication skills, both written and verbal, with the ability to manage multiple projects
