Head of M&E | Dublin / Europe

- Tier 1 Main Contractor with Strong Pipeline
- High-Profile Building & Mission-Critical Projects
- Excellent Package & Senior Leadership Role

Oradeo Recruitment is currently seeking a **Head of Mechanical & Electrical (M&E)** for a leading Tier 1 contractor delivering landmark data centre, life sciences, and commercial projects across **Ireland and mainland Europe**. This is a strategic, high-impact leadership position ideal for an experienced professional ready to shape and drive the company's M&E delivery model at a pan-European level.

Key Responsibilities

- Provide executive-level leadership across all mechanical and electrical functions within the business
- Oversee planning, design, execution, commissioning, and handover of M&E

systems on major projects

- Develop and implement M&E strategies, standardized processes, and best practices across regions
- Lead and mentor M&E project teams, ensuring alignment with company objectives and project milestones
- Collaborate with project directors, clients, and design teams to ensure technical excellence and innovation
- Manage project resourcing, budgets, and risk in relation to M&E scope
- Ensure all systems comply with industry standards, safety regulations, and quality assurance protocols
- Support business development, tendering, and client presentations as the M&E subject matter expert
- Stay current on emerging technologies and regulations within the data centre and life sciences sectors

Requirements

- Degree qualified in Mechanical, Electrical, Building Services Engineering, or similar
- 10+ years' experience in M&E project delivery, including large-scale, high-tech builds (e.g. data centres, pharma, commercial)
- Proven leadership in a senior MEP role with a Tier 1 contractor or consultancy
- Deep knowledge of international M&E codes, standards, and systems (HV/LV, BMS, HVAC, fire protection, etc.)
- Exceptional stakeholder management, negotiation, and team development capabilities
- Strong commercial awareness and experience in budgeting, cost control, and value engineering

- Willingness to travel between project locations in Ireland and Europe

What's on Offer

- Highly competitive executive package
- Full travel and accommodation support for European assignments
- Opportunity to shape the strategic direction of M&E delivery within a growing international business
- Long-term career development
