

Logistics Project Manager | Benelux Region

Logistics Project Manager | Benelux Region

- International market-leading construction organisation with significant annual turnover
- Excellent package with scope for career development
- Large-scale, prestigious projects including Data Centres, Pharmaceutical Facilities, and Industrial Developments

About Oradeo

Oradeo is an international recruitment and project services consultancy specialising in the delivery of mission-critical construction projects across Europe. We work with global blue-chip clients and tier-one contractors to provide high-quality staffing, logistics solutions, and project support.

As part of our expanding operations in the data centre sector, we are seeking a **Logistics Project Manager** to support the delivery of multiple large-scale hyperscale and colocation data centre facilities across the Benelux region.

Role Overview

The Client-Side Logistics Project Manager will act as the client's representative for all site logistics and site services activities. You will develop and implement logistics strategies, coordinate material flow, ensure site accessibility, and support both construction and commissioning teams

throughout all project phases.

This role requires strong technical knowledge of data centre construction, excellent stakeholder coordination skills, and the ability to lead logistics activities in high-pressure, mission-critical environments.

Key Responsibilities

Logistics Strategy & Planning

- Develop the full project logistics strategy, including delivery management, site access, traffic flows, waste movements, and laydown areas.
- Conduct logistics risk assessments and integrate mitigation measures into the plan.
- Coordinate logistics planning with design teams, general contractors, commissioning managers, and specialist vendors.
- Produce and update the Logistics Execution Plan (LEP) in line with project schedule changes.

Material Movement & Delivery Coordination

- Manage delivery scheduling, booking systems, logistic gates, and material tracking processes.
- Oversee heavy-lift and critical equipment delivery operations (transformers, generators, switchgear, batteries, cooling equipment).
- Monitor progress against the master schedule and ensure logistics readiness for key installation phases.
- Ensure all deliveries meet security, documentation, and handling requirements.

Site Services Management

- Oversee setup, maintenance, and optimisation of welfare, security, storage, and temporary works.

- Manage waste removal systems, recycling, and environmental controls.
- Ensure roadways, hoarding, access routes, and emergency walkways are maintained to high standards.
- Coordinate cranes, forklift operations, hoists, MEWP usage, and other material handling equipment.

Coordination & Stakeholder Management

- Act as the primary logistics liaison between the client, main contractor, subcontractors, and specialist suppliers.
- Lead coordination meetings for logistics and site services.
- Support commissioning teams with material availability, safe access, and logistics sequencing.
- Monitor contractor performance and ensure compliance with client logistics requirements.

Compliance, Safety & Quality

- Ensure all logistics operations align with client and site-specific HSE standards.
- Conduct regular audits of logistics areas, vehicle movements, lifting operations, and waste systems.
- Support incident investigations and contribute to safety improvement plans.
- Maintain quality control over storage of sensitive equipment (HV/MV electrical equipment, IT racks, prefabricated units, etc.).

Documentation & Reporting

- Maintain detailed cost, delivery, and operational logs.
- Prepare weekly and monthly logistics progress reports for the client's leadership team.

- Manage logistics documentation including delivery schedules, traffic plans, method statements, and permits.
 - Utilise digital tools for material tracking, delivery coordination, and reporting (e.g., Procore, Aconex, BIM 360, or similar).
-

Candidate Requirements

Experience

- 10+ years' experience in construction logistics management, preferably on large-scale or mission-critical projects.
- Previous experience in data centres, pharmaceuticals, semiconductor, or high-tech industrial environments is advantageous.
- Experience in client-side, consultancy, or owner's representative roles is beneficial.

Technical Competencies

- Logistics planning and execution on complex construction sites
 - Heavy equipment delivery and lifting operations
 - Temporary works, site services, and enabling works
 - Traffic management and waste management systems
 - Commissioning logistics sequencing
 - Proficiency using digital construction and delivery management tools
-

Package

- Competitive salary (depending on experience)

- Travel and rotation support where required
 - Accommodation assistance
 - Opportunity to work on multiple major data centre programmes
 - Ongoing professional development with Oradeo
 - Long-term career progression in the mission-critical project sector
-
