Mechanical Engineer | Europe/Dublin

- Large International Market Leading Main Contractor
- Excellent Package and Career Development Prospects
- Large Prestigious Projects

Oradeo Recruitment is currently recruiting for a **Mechanical Engineer** to work with a market leading Mechanical, Electrical & Instrumentation contractor in Europe/Dublin on a permanent basis.

Duties and Responsibilities:

- Provide Technical Support to the construction team
- Prepare AutoCAD drawings for construction and to coordinate between contractors to ensure services fit
- Maintain a set of redline drawings showing progress and changes
- Prepare as-built drawings for inclusion in the operations and maintenance manual
- Monitor and expedite equipment deliveries
- Prepare and keep up to date the delivery schedule to control deliveries

- Seek to clarify queries with the design team through the request for information system
- Manage subcontractors including the commissioning progress reports
- As a **Mechanical Engineer**, you will prepare method statements and risk assessments (with the construction team) for production activities
- Prepare test packs for recording the completion of systems
- Carry out quality control through inspections and snagging
- Carry out document control, recording and transmitting information and drawings using the document control system
- Compile an operations and maintenance manual for handover to the client
- Prepare valuations for submittal to the client on a monthly basis
- Carry out measures of work completed and prepare productivity (S/E) reports
- Attend and record regular supply chain meetings to ensure that progress is monitored and maintained within the overall construction programme
- Process internal procurement from equipment enquiries through requisitioning and monitoring manufacture through to delivery to site whilst maintaining a comprehensive audit trail
- As a member of the engineering team the **Mechanical Engineer** will liaise with the design team and supply chain to ensure correct operation of the plant on site and successful handover
- Develop a strong and maintain an excellent working relationship from the start to the completion of the project

Necessary Requirements:

- 3rd level qualification in Building Services or Mechanical Engineering or equivalent
- Minimum of 5 year's previous experience in a similar Mechanical Engineer position
- Experience in data centre, pharmaceutical or industrial sectors in excess of €15 million would be advantageous
- You will be in the possession of a State License allowing you to sign off on technical documents and installation within the Mechanical industry
- Excellent time management skills and the ability to meet tight deadlines
- Self-motivating, and the ability to work well as part of a team
- Excellent communication and interpersonal skills
- Strong operational skills and an attention to detail
- Ability to work under pressure and anticipate any problems
