Oradeo Recruitment is presently seeking interest for an experience **Mechanical Engineer** to join an international market leading Main Contractor working on a number of large and prestigious projects (Pharmaceutical, Mission Critical, Industrial, Commercial etc.) within Ireland and Mainland Europe.

Mechanical Engineer Responsibilities:

- Provide Technical Support to the construction team.
- Prepare AutoCAD drawings for construction and to coordinate between contractors to ensure services fit
- Maintain a set of redline drawings showing progress & changes.
- Prepare as- built drawings for inclusion in the Operations & Maintenance manual.
- Monitor and expedite equipment deliveries.
- Prepare & keep up to date the delivery schedule to control deliveries.
- Seek to clarify queries with the design team through the request for information (RFI) system.

- Manage sub-contractors including the commissioning progress reports.
- As a **Mechanical Engineer** you will prepare method statements and risk assessments (with the construction team) for production activities.
- Prepare test packs for recording the completion of systems.
- Carry out Quality Control through inspections and snagging.
- Carry out document control, recording & transmitting information & drawings using the document control system.
- Compile an Operations & Maintenance manual for handover to the client.
- Prepare valuations for submittal to the client on a monthly basis
- Carry out measures of work completed and prepare productivity (S/E) reports
- Attend & record regular supply chain meetings to ensure that progress is monitored & maintained within the overall construction programme
- Process internal procurement from equipment enquiries through requisitioning & monitoring manufacture through to delivery to site whilst maintaining a comprehensive audit trail
- As a member of the engineering team the **Mechanical Engineer** will Liaise with the design team & supply chain to ensure correct operation of the plant on site & successful handover
- Develop a strong & maintain an excellent working relationship from the start to the completion of the project

Necessary Requirements:

- 3rd level qualification in Building Services or Mechanical Engineering or equivalent
- Minimum of 5+ year's previous experience in a similar **Mechanical Engineer** position
- Experience in data centre, pharmaceutical or industrial sectors in excess of €15 million would be advantageous
- Excellent time management skills and the ability to meet tight deadlines
- Self-motivating, and the ability to work well as part of a team
- Excellent communication and interpersonal skills
- Strong operational skills and an attention to detail
- Ability to work under pressure and anticipate any problems
