Mechanical Project Manager |Limerick

- One of Ireland's top 5 M&E Contractors turning over €180+ million annually and growing
- Excellent package on offer with clear scope for career development
- Large prestigious projects for many well-known blue-chip clients within Pharmaceutical, Data Centre and Industrial sectors

Oradeo Recruitment is presently seeking interest for an experienced **Mechanical Project Manager** with strong Piping background o work on a Pharmaceutical Project in Limerick.

Oradeo Recruitment's client is an International Mechanical and Electrical Company which has gained significant experience across a wide section of construction sectors including commercial, industrial, data centre, pharmaceutical or power generation on both public and private tenders/projects.

As a **Mechanical Project Manager**, you will receive professional and personal development opportunities to help you become a future leader within the organisation in addition to a fantastic salary with heaps of additional benefits.

Mechanical Project Manager Responsibilities:

- Coordinate Mechanical design, work with consultants and subcontractors
- Supervise the progress of work
- Project target margins are achieved or exceeded
- As a **Mechanical Project Manager**, you will prepare the project programme, including the delivery strategy and ensure project milestones are achieved
- Ensure smooth and timely flow of information between all parties to the contract.
- Endeavour to identify and predict potential bottlenecks and delays and action remedies
- Keeping the project stakeholders informed of progress, cost and any other relevant issues.
- Review project scope, and manage the budget and schedule.
- Manage safety and quality aspects of the project in accordance with company procedures
- Agree valuations and final accounts with contractors and sub-contractors.
- Establish performance and delivery criteria, ensuring that client requirements are being met
- As part of the day to day duties, the **Mechanical Project Manager** will be tasked to develop and administer quality control provisions; liaise on project cost estimating and value engineering, as appropriate
- Liaise with the client on KPI development and implementation
- Track and report at weekly client update meetings
- Authorise the issuance of contracts, purchase orders, and change orders in addition to approving contractor invoices for payment
- As a member of the management team, the **Mechanical Project Manager** will represent the Company in business with customers, consultants, contractors, and other public and/or private agencies and organisations
- Research and prepare various reports pertaining to contractual issues, operations, policies, procedures, and/or other issues, as appropriate
- Planning of all resources including labour, materials and sub-contractors
- As a **Mechanical Project Manager** you will be tasked with managing and driving a large team to meet with all project requirements and deadlines
- Creation of installed drawings and O&M Manuals.
- Develop a constructible and detailed schedule with the project planner

Necessary skills and requirements:

- Building Services Engineer / Mechanical Engineer or Senior Trades qualification or equivalent
- Significant Project management experience 8 years+.
- Previous record of delivering small to medium mechanical pharmaceutical project
- Pre-commissioning & system turnover experience

- HVAC and building services experience
- Commercial Awareness
- Experience in Process Piping, BMS Systems, HVAC, Clean & Dirty Utilities Piping, is desirable.
- Excellent communicator/strong interpersonal skills/communicates with impact
- Excellent record keeper and administration skill
- Drives for results
- Leads and influences others.
- Identifies and achieves commercial value.
- Innovates and leads in mechanical/technical activity and challenges.
- Plans and effectively manages projects.
- Solves problems analytically and acts decisively
- Mentor and Coach to junior engineers and graduates
