

# Pre-Construction Manager Dublin

**Pre-Construction Manager** – Oradeo Recruitment is currently recruiting a Pre-Construction Manager based in Dublin – Ireland for a market leading Mechanical & Electrical contractor. This is an excellent opportunity for an individual to be heavily involved in blue-chip, prestige projects such as data centres, pharmaceutical labs, heavy industry, utilities & power generation.

**Oradeo Recruitment's** client is an International Mechanical and Electrical Company which has gained significant experience across a wide section of construction sectors including commercial, industrial, data centre, pharmaceutical or power generation on both public and private tenders/projects.

You will be responsible for designing, organising, leading, coordinating and controlling all tasks in relation to the construction of Electrical projects.

## **Overview of Pre-Construction Manager responsibilities**

- Review and understand client/project ER's.
- Responsible for the successful delivery of the preconstruction portion of the project.
- Management of the preconstruction process and gateways to delivery.
- Prepare and execute elements within the project PCS.
- Preparation of planning & permitting documentation.
- Handover workshops from preconstruction team to delivery team.

## **Necessary skills and requirements:**

- 3<sup>rd</sup> level qualification in construction/engineering.
- On site delivery and construction experience essential with data centre experience advantageous.
- Process driven with strong leadership skills.
- Strong people and client relationship attributes.
- Self motivated and works on own initiative.
- Effective communication skills.

## **Benefits:**

- Working on large scale data centre projects
- Collaborative team working environments.
- Career progression and development supported.
- Competitive salary packages
