

Project Quantity Surveyor | Dublin

Project Quantity Surveyor | Dublin

- High-profile commercial projects in Dublin
- Competitive salary and benefits package
- Opportunities for career progression in Quantity Surveying and Commercial Management

About Oradeo

Oradeo is an international recruitment and project services consultancy specialising in mission-critical construction projects across Europe. We work with global blue-chip clients and tier-one contractors to provide high-quality staffing, project support, and managed labour solutions.

We are recruiting an experienced **Project Quantity Surveyor** for commercial projects in Dublin. This is an excellent opportunity to lead commercial and contract activities on high-profile projects, supporting project teams in cost management, contract administration, and value delivery.

Role Overview

The Project Quantity Surveyor will own all quantity surveying responsibilities for assigned projects, ensuring commercial and contractual commitments are met, and value is maximized. The role involves collaboration with Project and Commercial Managers, contract administration, subcontractor management, and reporting to senior leadership.

Key Responsibilities

- Manage day-to-day commercial and contract activities across projects.
- Undertake contract administration, including change management and

maintenance of registers (e.g., Change Order Log).

- Negotiate and obtain best value in the placement of subcontract orders.
- Support the management of project budgets, cost plans, and feasibility studies.
- Validate and approve subcontractors' interim applications and final submissions in compliance with applicable construction contracts legislation.
- Lead pre-appointment subcontractor meetings to clarify scope and mitigate contractual risk.
- Prepare accurate monthly Cost Value Reports for review by project leadership.
- Maximise cash flow through timely submission of Monthly Valuations with full supporting documentation.
- Negotiate, draft, and submit Final Accounts, including claims for loss, expense, delay, disruption, or time extensions.
- Maintain productive relationships with design team professionals and client representatives.
- Ensure adherence to team commercial procedures and delegated authority responsibilities.

Candidate Requirements

- Bachelor's Degree in Quantity Surveying & Construction Economics or equivalent, recognised by SCSI/RICS.
- 3–5 years' experience as a Quantity Surveyor on commercial construction projects.
- Knowledge of contract forms such as NEC, RIAI, FIDIC, or similar.
- Ability to critically evaluate documentation and identify commercial opportunities.

- In-depth understanding of construction processes, techniques, and systems.
- Strong commercial awareness, numeracy, and report-writing skills.
- Strong negotiation, conflict management, and process-focused skills with attention to detail.

Package

- Competitive salary
- Pension and life assurance
- Healthcare benefits
- Car allowance or company vehicle
- Continuous Professional Development (CPD) and structured career progression
