Senior Engineer | Connacht| Top Specialist Construction Company

- One of Ireland's reputable offsite specialist Construction Companies
- Excellent Opportunity to take a lead role within a highly innovative company in Connacht
- Excellent Package on offer with scope for further career development

Oradeo Recruitment is currently seeking an experienced **Senior Engineer** to work in Connacht with travel to Dublin for one of the country's Specialist offsite Construction Companies on a permanent basis. The successful **Senior Engineer will be based in Galway** with travel to Dublin and will have the opportunity to work on a multitude of **specialist projects** surrounding the Connacht area.

Senior Engineer Responsibilities:

- Ensuring that site and graduate engineers take responsibility for the management of survey equipment
- Ensuring the engineering team completes as-built surveys for key elements
- Understanding key tolerances and can analyse details across a number of interfaces to highlight potential problems

- Advanced knowledge of key packages such as concrete, drainage, steelwork and brickwork
- Understands the cost of defects and remedial works
- Working actively to close out NCR's in a timely manner
- Issuing of "Permits to break ground"
- Reviewing and creating method statements and risk assessments
- Identifying where information is missing and has an excellent working knowledge of the project RFI process
- Undertaking the role of the Temporary Works Co-ordinator (When appointed) and ensuring the Temporary Works procedures are implemented for both direct and subcontracted works
- Undertaking the role of Project Lifting Operations Appointed Person (When appointed)
- Providing information to the project planner to allow programmes to be updated or updates them personally
- Consistently stops site works, where they believe person(s) are at risk from a health and safety perspective
- Working collaboratively with other employees and sub-contractors engineers, utilising their experience at all times
- Developing consents schedules and understanding the key parties
- Responsibility for ground validation reports to fulfil planning obligations
- Developing the project logistics plan and has input into establishing the programme to completion
- Understanding outputs for various trades, highlighting where trades are falling behind programme or under resourced
- Key member of the project management team in the delivery of Health, Safety and Environmental presentations (Examples include project inductions, tool box talks, and crane team briefings)
- Assisting the project design manager in the design approvals process and establishes benchmarks and samples

Necessary Requirements:

- Eng Civil Engineering
- Temporary Works Co-ordinator training
- Lifting Operations basic awareness course
- A61 CPCS Lifting Operations Appointed Persons course
- Scaffold awareness/inspection
- Planning & programming software
