Senior Planner | Data Centre Projects | Frankfurt, Germany

Senior Planner | Data Centre Projects | Frankfurt, Germany

- Join major hyperscale Data Centre projects across Germany
- Play a key role in the planning and delivery of complex, large-scale construction projects
- Competitive salary and benefits package with opportunities for career progression

Oradeo Recruitment are seeking an experienced Senior Planner to join a leading international construction contractor delivering major Data Centre projects across Germany. The successful candidate will play a key role in the planning, coordination and successful delivery of large-scale, mission-critical developments, with opportunities to contribute throughout the tender, pre-construction and construction phases.

Senior Planner Responsibilities:

- Develop, maintain and manage detailed project programmes for major Data Centre projects from pre-construction through to handover.
- Prepare baseline programmes, monitor progress and produce regular planning and performance reports for project stakeholders.
- Analyse project progress, critical path activities and overall performance, identifying risks and opportunities to support successful project delivery.
- Collaborate closely with Project Managers, Construction Managers, Engineers and subcontractors to ensure programme objectives are achieved.
- Lead planning workshops, look-ahead planning sessions and schedule reviews to support effective project execution.
- Monitor resource requirements, procurement schedules and key project

milestones.
- Identify potential delays and develop mitigation strategies and recovery programmes where required.
- Provide planning expertise throughout tender, pre-construction and live project phases.
- Support project controls, progress measurement, earned value reporting and schedule risk analysis.
- Review construction methodologies and identify opportunities to improve programme efficiency and overall project delivery.

Necessary Skills & Requirements:

- Degree qualification in Construction Management, Engineering, Quantity Surveying or a related discipline.
- Minimum of 5 years' experience in construction planning on major construction projects.
- Proven experience delivering Data Centre projects or other large-scale mission-critical developments.
- Advanced knowledge of Primavera P6, with strong proficiency in Microsoft Excel and Microsoft PowerPoint.
- Strong understanding of critical path analysis, project controls, progress reporting and schedule risk management.
- Excellent communication and stakeholder management skills, with the ability to collaborate effectively across multidisciplinary project teams.
- Ability to work effectively in a fast-paced construction environment.
- Previous experience working on international construction projects is advantageous.
- Competitive salary and benefits package.
- Opportunities for career progression and continuous professional development.
