Senior Structural Engineer | Dublin

- **Market leading specialist construction company with significant annual turnover**
- **Excellent package with a clear scope for career development**
- **Opportunity to be involved in a number of prestigious, large and technically challenging projects across multiple facets of the industry**

Oradeo Recruitment is presently seeking interest for a **Senior Structural Engineer** on behalf of one of our clients who is a market leading specialist engineering construction company. The company are specialising in the design, manufacture and supply of specialist products to the UK & Irish construction markets. The company is headquartered in the Dublin area, with regional offices in the UK.

Oradeo Recruitment's client has an award winning reputation, they are a "best in class" Company, who collaborate with some of the most prestigious Clients, Architects, Consultant Engineers, Professional practices and Contractors in Ireland and the UK.

Senior Structural Engineer Responsibilities:

- The management and co-ordination of deliverables and resources on projects.
- Preparing conceptual, schematic, and detailed design solutions for

precast design.

- Liaising and co-ordinating with external design team members.
- Liaising with clients and their representatives (e.g. Architects, Engineers and Surveyors), including attending regular meetings to keep them informed of progress.
- Attending design team meetings as required.
- Respond to and resolve issues arising on projects in a timely manner.
- Contribute to internal process improvement, development and review of output to ensure compliance with all relevant legislation.
- Monitor team progress across projects with regular reviews and control.
- Responsible for coaching and managing the career development of team members, targeted to improve both their behavioural and functional competencies.

Necessary Skills and Requirements:

- You will possess a 3rd level qualification in Structural Engineering, Civil Engineering or similar.
- Chartered Structural Engineer with 10 years'+ post-graduate experience in the design and management of a range of building projects.
- Should be willing to lead by example and be project lead on projects.
- Tactical and strategic thinking are essential.
- Must have strong structural design experience.
- High levels of planning and a thorough orientation towards detailing.
- In depth knowledge of construction & constructability practices & principles.
- Leadership skills and experience managing a design team essential.
- Excellent attention to detail, written and oral communication skills.
- Knowledge of current BIM operating systems and standards along with proficiency in the use of Microsoft Office (Word and Excel), Project and BIM tools.
- Track record working with clients.
- Self-Motivated with ability to work on own initiative

For more information about this Senior Structural Engineer role or other Design Engineer positions, contact Eavan McCallig at Oradeo Recruitment confidentially on +353 1 687 7188 or apply in confidence.
