Site Engineer |Dublin – Cork – Leinster

- Leading specialist in construction
- Excellent Career Progression Opportunities along with a Generous Package

Oradeo Recruitment is presently seeking interest for an experienced Site Engineer to join one of Ireland's leading Tier 1 Construction Company. This position will come with an excellent remuneration package and a clear path for career growth and development.

Duties and Responsibilities:

- Acting as the main technical adviser on a construction site for subcontractors, craftspeople, and operatives
- Setting out, levelling and surveying the site and reconciling tender submissions
- Checking plans, drawings, and quantities for accuracy of calculations
- Ensuring that all materials used, and work performed are in accordance with the specifications
- Overseeing the selection and requisition of materials
- Agreeing a price for materials and making cost-effective solutions and proposals for the intended project, value engineering as necessary and possible
- Managing, monitoring, and interpreting the contract design documents supplied by the client or architect
- Liaising with any consultants, subcontractors, supervisors, planners, quantity surveyors and the general workforce involved in the project

- Liaising with the local authority (where appropriate to the project) to ensure compliance with local construction regulations and by-laws
 - Communicating with clients and their representatives (architects, engineers, and surveyors)
 - Attending regular meetings to keep clients/representatives informed of progress
 - Carrying out day-to-day management of the site, including supervising and monitoring the site labour force and the work of any subcontractors
 - Planning the work and organising required plant and site facilities in order to meet agreed deadlines
 - Overseeing quality control and health and safety matters on site
 - Preparing reports as required
 - Keeping central Management updated daily on general progress of project completion
 - Resolving any unexpected technical difficulties and other problems that may arise
 - Overseeing site operations and assisting with site paperwork
 - Managing and overseeing all engineering functions and assisting in all contracts as required
 - Working in conjunction with Safety Cert Health and Safety System
 - Site setting out taking measures and creating Asbuilt drawings
 - Helping to negotiate final accounts with measurement records
 - Assisting with Tendering Pre-Quals
 - Overseeing and carrying out risk analysis
 - Ordering materials from suppliers
 - Managing site staff and getting involved with general overall productivity
 - Liaising and running of surfacing crews on site
 - Directly managing a number of projects, with site agents and client engineers reporting to Directors
-
- Involving commercial ability, including traffic management, interim and final accounts, and contract claims where appropriate
 - Managing contracts from initial enquiry through programme, preparation for paving, civils, lining, billing and account agreement
 - Managing Project Costs on site and liaising and attending meetings as required with the company accountant

Necessary skills and requirements:

- 3rd level qualification in Construction Management/Engineering
- Ideally possessing 3+ years' experience working with a main contractor/specialist subcontractor acting as a Site Engineer within Ireland or the UK
- Strong setting out experience
- Strong operational skills and an attention to detail
- Familiar with MS Office applications such as Word, PowerPoint, Excel and Outlook
- Strong and effective communication and interpersonal skills
- Analytical thinker with demonstrated problem solving skills
- Ideally you will possess experience working in the following sectors: commercial, pharmaceutical, residential, high rise, industrial, data centre,

mixed use in excess of €5 million

- Enthusiastic and Hardworking
