

# Site Engineer | Dublin

## Site Engineer | Dublin

- Leading Construction Company delivering large-scale projects across Ireland
- Market competitive salary and benefits package
- Opportunities for career progression and professional development

## About Oradeo

Oradeo is an international recruitment and project services consultancy specialising in the delivery of mission-critical construction projects across Europe. We work with global blue-chip clients and tier-one contractors to provide high-quality staffing, project support, and managed labour solutions.

As part of our ongoing expansion, we are recruiting a **Site Engineer** to support delivery on projects in Dublin. This is a fantastic opportunity to work on medium to large-scale commercial and residential projects, supporting the project team to deliver on time, budget, and to the highest quality standards.

## Role Overview

The Site Engineer will manage on-site operations, translate designs into actionable tasks, and coordinate subcontractors, trades, and site teams. The role requires strong technical knowledge, excellent problem-solving skills, and the ability to maintain high standards of safety and quality.

## Key Responsibilities

- Oversee day-to-day site activities, ensuring all work aligns with project plans, schedules, and specifications.
- Monitor project progress and maintain accurate site records in the daily site diary.
- Coordinate and supervise subcontractors and tradespeople for efficient workflows and quality output.
- Conduct regular inspections to ensure adherence to technical drawings,

specifications, and quality standards.

- Ensure compliance with health, safety, and welfare management systems, including conducting inductions, toolbox talks, and risk assessments.
- Set out site works using robotic total stations, GPS, and other surveying tools for accurate layouts.
- Manage plant, labour, and materials, including monitoring day-work and liaising with suppliers for timely orders.
- Address technical issues on-site, interpret drawings, and communicate design changes or construction challenges to the team.
- Act as the primary point of contact on-site for contractors, suppliers, inspectors, and regulatory authorities.
- Report regularly to management on project progress, resources, and any issues affecting timelines or budgets.

### **Candidate Requirements**

- Bachelor's degree in Construction Management, Civil Engineering, or related field.
- 3-5 years' experience as a Site Engineer on medium to large-scale construction projects.
- Strong understanding of construction methodologies and Irish building regulations.
- Experience with AutoCAD, MS Project, or other construction software.
- Excellent organisational, communication, and problem-solving skills.
- Ability to work under pressure while maintaining attention to detail.
- Team-oriented approach with ability to build strong working relationships.

### **Package**

- Competitive salary
- Company vehicle or travel allowance
- Company laptop and phone
- Pension, life insurance, and income protection
- Continuous Professional Development (CPD)
