[Structural Design Engineer | Connacht \(EMC\)](#)

[Structural Design Engineer | Connacht | Top Specialist Construction Company](#)

- **One of Ireland's reputable offsite specialist Construction Companies**
- **Excellent Opportunity to take a lead role within a highly innovative company in Connacht**
- **Excellent Package on offer with scope for further career development**

Oradeo Recruitment is currently seeking an experienced **Structural Design Engineer** to work in Connacht for one of the country's Specialist offsite Construction Companies on a permanent basis. The successful **Structural Design Engineer** will be based in Galway and will have the opportunity to work on a multitude of **specialist projects** surrounding the Connacht area.

The **Structural Design Engineer** will be involved in the co-ordination of those areas of the design process on live project(s) under their control.

Structural Design Engineer Responsibilities:

- Ensuring the design recognises all aspects of health & safety, environmental and quality related matters
- Liaising with the site team to ensure buildable and robust details with the agreement of the construction team
- Checking sub-contractors/design drawings for compliance and interface
- Managing design consultants and sub consultants along with design subcontractors to ensure correct and timely delivery of all design related information for the execution of the works on site
- Site visits and factory visits as required
- Reviewing design drawings by technical team
- Proactively coordinating with project managers, design disciplines, construction management team, contractors and Clients

Necessary Requirements:

- Relevant structural engineering experience in concrete and steel design – preferably Light Gauge Steel
- Experience of working with drafting and engineering design software tools. MasterSeries, TEDDS, and ROBOT Structural Analysis Professional
- Proven analytical skills and an in-depth understanding of the underlying principles of structural analysis.
- Excellent verbal and written communication skills and proven report writing ability.
- Experience in design, ideally contractor design experience.
- Ability to make decisions and work on own as well as part of a team.
- Site experience would be an advantage.
- Positive attitude and proactive problem-solving approach.
- 5-7 years structural design experience.
